

# IonCleanse Foot Baths

The IonCleanse by AMD is a unique total body detox that uses biocompatible electrical frequencies with the healing power of ions – the same kind of beneficial ions that make you feel so wonderful walking along the beach or near a waterfall. The IonCleanse by AMD is the safest and most effective way to cleanse and purify the body.

Ion Therapy

## How does it work?

The IonCleanse by AMD's proprietary and patented technology results in only biocompatible electrical frequencies entering the water. Biocompatible frequencies elicit a relaxation response in the body. Concurrently, the electrical frequencies create an ionic field that cleanses and purifies the body through the healing power of ions.

The IonCleanse process ionizes the water, as  $H_2O$  is split into  $OH^-$  and  $H^+$  ions. These ions attract and neutralize oppositely charged toxins. After the process the user feels invigorated, refreshed, and relaxed.

## Is the IonCleanse by AMD safe?

The IonCleanse by AMD has been on the market since 2002. Our perfect safety record, medical- grade quality, and special proprietary technology ensure that the user will never be exposed to dangerous electrical frequencies. Other ionic foot bath machines expose the user to stress-inducing frequencies; such as EMFs, AC ripple, leakage current, and hazardous voltages. The potential side-effects from other footbaths range from disrupting the body's electrical system causing headaches, nausea, and other discomforts, to painful electrical shocks. The IonCleanse by AMD is the only unit with CE and FCC safety clearances. No other unit on the market has met these standards
